

MARTPOL

We are a family company. We started our business in 1994 with the production of products ensuring sleep comfort. Quilts, pillows and other bedroom textiles, intended for children and adults formed the basis of our production. Over 30 years of experience in the production of these products meant that we got to know the needs of the client and his expectations. We have obtained the most valued European certificates for home textiles produced by us over the years we have expanded our offer to include products for the furniture industry. The most modern lines produce fluffy and needle-punched nonwoven fabrics for furniture factories producing upholstered furniture in Poland, and abroad. We organize transport for our clients and individual orders. We will be happy to meet your requirements expectations and we cordially invite you to cooperate.

Beata, Mariusz Martynowicz and sons

Martpol

- 1 THE HIGH-FLUFFY NONWOVEN
- 3 THE NEEDLE-WOVEN FABRIC-PREMTX
- 5 THE NEEDLE FELT
- 7 THE FABRIC QUILTING
- 11 THE FILLINGS
- 13 THE QUILTS AND PILLOWS
- 15 THE WOOL KNITTWER

THE HIGH-FLUFFY NONWOVEN

Variants: polyester; silicone; with a mixture of other fibers, e.g. wool

Weight: 60g/m²-1000g/m²

Width: up to 340 cm

Roll length and diameter: personalized

Packaging method: LDPE bag

Application: furniture industry; clothing;
animal beds; clothing; pet beds;
for the production of quilts
and sleeping bags and mattresses.

- OEKO-TEX STANDARD 100 class 1 certificate
- flame retardancy certificate granted by the INTERTEK Institute
- flame retardancy certificate (California Test) granted by the GOVMARK Institute in New York

THE NEEDLE-WOVEN FABRIC PREMTEX

Description: high resistance to stretching and tearing, low grammage; high evenness of grammage over the entire surface of the product

Composition: 100% polyester; 100% polypropylene; mixed

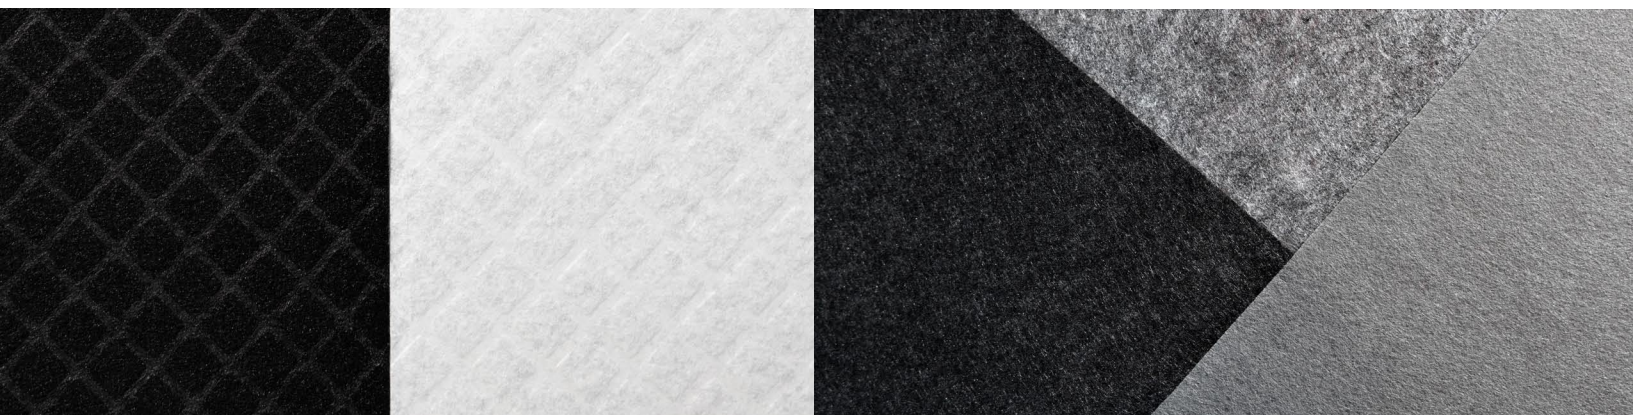

Weight: 80g/m²-200g/m²

Width: max 320cm

Color: black; white; gray

Texture: double-sided smooth T2; single-sided smooth T1; single-sided embossed (EM)

Application: protection for springs; material enabling the attachment of Velcro

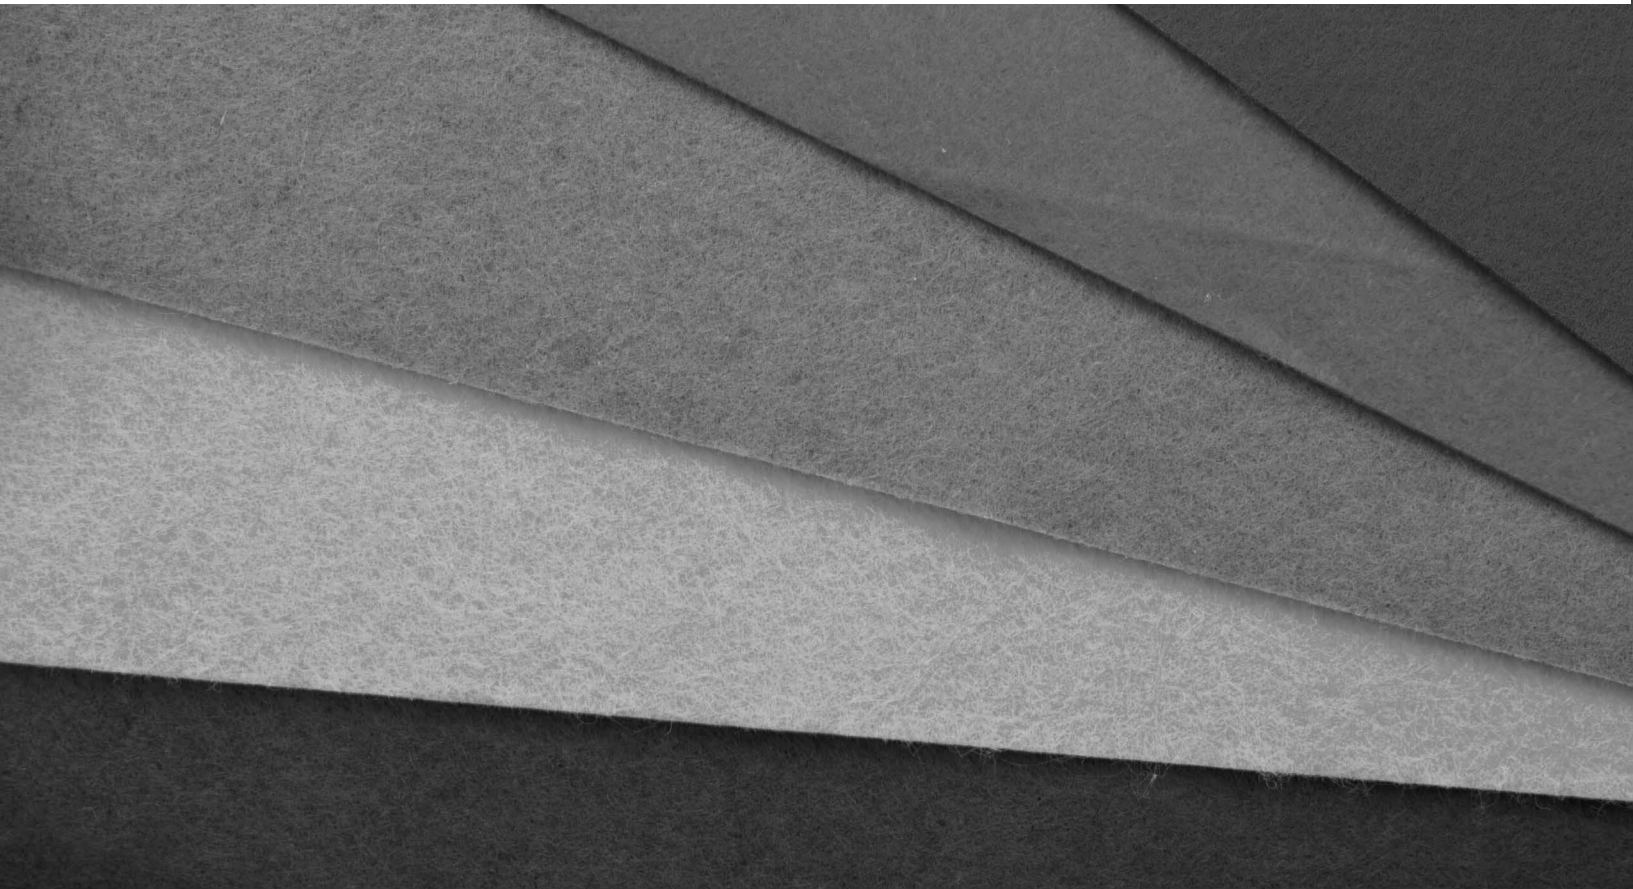

Applied:

- furniture industry – upholstery fabric for the bottom and back of upholstered furniture and strings
- Automotive industry
- construction – membranes

THE NEEDLE FELT

Description: resistant to damage and tearing; structure protects against high temperatures;
muffles sound; easy to process in the recycling process;
high uniformity of grammage over the entire surface of the product (up to 4%)

OEKO-TEX certificate and INTERTEK flame retardancy test

Composition: 100% polyester; multi-component mixture

Weight: 200g/m²-1000g/m²

Width: max 320 cm in roll form

Confection: sizes adapted to the customer's requirements

Color: white; black; gray

Applied:

- furniture and mattress industry - used as a layer separating the spring layer with layers of sponges or other materials;
- interior decoration - felt lamellas;
- footwear industry - for shoe insulation and as an insole;
- automotive industry - including car seats, insulation;
- protection in transport - including as lining in transport boxes; -
- everyday use - as a support for furniture or bumpers;
- construction – roofing and road membranes

THE FABRIC QUILTING

Technology: thread quilting

We carry out orders using our own materials of the highest quality, as well as on materials provided by the customer, up to 240 cm wide.

We have a wide range of ready-made designs and we can make them any project.

Mattress Cover:
fluffy fiber combined with fabric
(e.g. cotton or polycotton).

Topper(mattress cover):
quilted mattress foam
with mattress fabric

Description (quilting fabrics): the same shape ; excellent thermal insulation; easy care;
high resistance to dirt; quick drying; accuracy and repeatability of the pattern.

Used for quilting fabric intended for mattress cover are high-quality threads. The thread color is selected depending on the required design.

We make and finish up to 15,000 meters of quilts and mattresses and toppers in one day.

THE FILLINGS

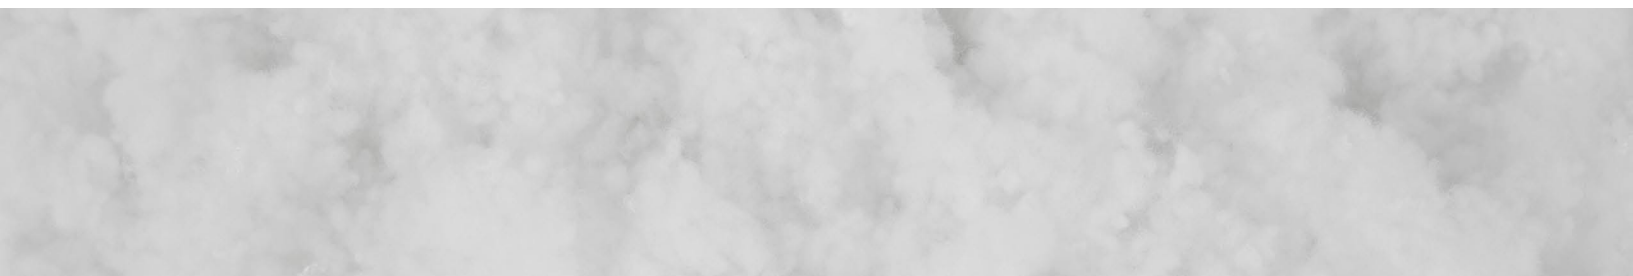

SILICONE BALL AND COMBED

Ball and combed silicone fiber HCS is currently the best substitute for natural down. The properties of this fiber ensure high fluffiness, elasticity and lightness our products. The fiber is also characterized by great softness and resistance to distortion.

Applied: filling of pillows; plush toys, animal beds; sleeping bags; clothing industry; production of baby strollers and others

Composition: virgin HCS fiber; recycled HCS fiber.

FOAM CHIPS

It is made of polyurethane foam (PUR) cut into short, thin strips.

Application: filling in production e.g. upholstered furniture, decorative pillows, garden and bedding, toys, beds for pets; filler and material protective in transport.

Description: high elasticity and resistance deformation, lightness, warmth, good insulation,

Composition: polyurethane foam (PUR).

THE QUILTS AND PILLOWS

Covering fabrics: cotton; microfiber; polycotton; polyester; terry

Filling: synthetic (silicone fibers, polyester-silicone ball); natural (sheep or camel wool) and special antibacterial filling Wellman Health Guard.

Quilt dimensions: 135cm x 200cm; 155cm x 200cm; 220cm x 200cm; non-standard

Pillow dimensions: 40cm x 40cm; 50cm x 60cm; 70cm x 80cm; non-standard

Quilting: pattern personalization available

We also produce pillows for various types of furniture, including garden furniture.

THE WOOL KNITWER

We offer single-color and jacquard knitwear (2-3 colors).

Additional possibilities: tumbler (twisting a bunch of curls); scratching (pulling out parts fleece on the inner side);tumbled-scratched

Composition: 100% wool; 100% polyester; mixed

Yarn: polyester; cotton

Weight: 300g/m²-520g/m²

Width: up to 225 cm

Clipping height: up to 22mm

Designs: personalized

Color: ecru; natural brown; black

Sheep fleece description: excellent biological thermal isolate; resistant dirt; anti-allergic - its fibers contain lanolin; environmentally friendly; undergoes biodegradation processes

Applied: home textiles, clothing, footwear and furniture industries
